

REGISTRO

A wireframe diagram of a mobile application registration screen. The screen is enclosed in a red rounded rectangle with a simulated status bar at the top and a home indicator at the bottom. The layout includes a header with a logo and name, a title bar, and several input fields for user information. A 'Crear cuenta' button is positioned below the password field, and a login link is at the bottom. A vertical line on the right side of the screen indicates a scrollable area, with an arrow pointing upwards.
